**Re: Submittal Date for FS Review Comments  
Lenz Oil Site  
Lemont, Illinois**

Dear Mr. Imse:

U.S. EPA is in the process of finalizing its review of the Lenz Oil Feasibility Study report, Revision No. 2, submitted on March 23, 1995. The U.S. EPA review comment letter will be submitted to ERM on June 29, 1995. In the course of reviewing the FS report, it became necessary to revisit and revise the Preliminary Remediation Goals document prepared in 1993 by PRC Environmental Management, Inc. to ensure that the information on toxicity and health risks in this document was consistent with current U.S. EPA guidance.

The analysis of remedial alternatives presented in Revision No. 2 of the Lenz Oil FS report was greatly improved and was more comprehensive than that in the initial draft report. However, U.S. EPA will be requesting a number of changes in the next revision of the document. If you have any questions before receiving the review comments or would like to discuss other matters, please give me a call at (312) 886-4785.

Sincerely,

  
Mary Tierney  
Remedial Project Manager
